I'm a Backend developer with strong inclination for creating high performance systems and intuitive user interfaces. My experience with RESTful APIs, modern Frontend and Backend frameworks, and database optimizations allows me to connect robust infrastructure with smooth user experience. I'm currently exploring serverless architectures and perfecting full stacks workflows, with the goal of achieving efficient integration between clean code, scalable databases and responsive interfaces

Skills

- **Programming Languages**
 - Python
 - JavaScript
 - Typescript
- **Frameworks**
 - NodeJS
 - NextJS
 - React
 - FastAPI
 - Django
- **Databases**
 - PostgreSQL
 - Firebase
- **Tools**
 - Docker
 - ORM

Experience

2023/06–2025/08

Full Stack Developer / Grupo Sysven

A full stack developer at a software consultancy company focused on ERP related applications designs and builds both frontend and backend services that integrate seamlessly with ERP system, using modern frameworks and databases like PostgreSQL. In addition, they collaborate with clients to gather requirements, deploy solutions using Docker or on-premise workflows, and maintain performance through continuous testing and optimization processes

Projects

- System to synchronize two PostgreSQL databases bidirectionally
 - Web Inventory system for a medical supplies company
 - API for various management reports, integrated with ERP system
 - System for managing parking lot tickets in a condominium
-

Education

2022/07-PRESENT

Systems Engineer / Universidad Nacional Experimental de las Fuerzas Armadas (UNEFA)

A systems engineering student at UNEFA, actively participating in technology initiatives and gaining practical experience in software develop

Diplomado en Programación/ Ingeniería Digital (Táchira-Venezuela)

I completed a programming diploma at Ingenieria Digital in Tachira, Venezuela, where I gained solid knowledge in Python and JavaScript from basic to advance levels. I also obtained practical experience with React, PostgreSQL, and related technologies. I am currently applying these skills to real develop task, focused on building interactive applications and system integration
